Ahmad Ali

Software Engineer

PIA Road Phase 1, 52000 Lahore,
+923098553906 • malikahmadse@gmail.com

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3 years of experience building scalable web applications and AI-integrated solutions. Proficient in MERN stack development, with hands-on expertise in AI model integration, knowledge graph systems, and data engineering pipelines. Experienced in multi-tenant architectures, workflow automation, and cloud-based systems using tools like Snowflake, Airflow, and AWS Lambda. Adept at designing intelligent decision-making systems, integrating AI into enterprise applications, and collaborating with cross-functional teams to deliver high-quality, data-driven solutions.

WORK EXPERIENCE

Prime Genesis of Technology , Lahore — Sep 2023 – Nov 2024

- Developed and maintained scalable MERN applications, improving reliability and user experience.
- Built RESTful APIs for faster data retrieval and optimized database queries to reduce server load.
- Collaborated with cross-functional teams for seamless frontend-backend integration.
- Engineered algorithmic trading bots and dynamic trading platforms with AI integration for smarter decision-making.
- Conducted code reviews and testing to uphold software quality standards.

Veda Ai , Uk — Dec 2024 – May 2025

- Worked on LLM-based solutions, designing and integrating AI models into production systems.
- Built AI-powered document analysis systems for automated content extraction and intelligent processing.
- Integrated AI capabilities into CRM and Kanban management systems to enhance workflow automation.
- Developed secure OAuth-based integrations with Microsoft ecosystem tools including SharePoint, Power Platform, and Outlook.
- Engineered web scrapers targeting UK-based companies for structured data extraction and business intelligence use cases.

Synoptix , Australia — Jun 2025 – Sep 2026

- Developed LLM-driven workflows for intelligent decision-making and process automation.
- Built and deployed AI model integrations on MCP servers, connecting with SharePoint, Teradata, and knowledge graph systems.
- Designed n8n-like workflow automation pipelines to streamline complex business processes.
- Implemented knowledge graph-based decision support systems, improving data-driven decision-making and operational efficiency.
- Integrated enterprise AI solutions across multiple platforms, enabling scalable and reusable systems for clients.

Intellilake , USA — Oct 2026 – Present

- Designed and maintained multi-tenant systems handling high-volume enterprise data.
- Integrated Snowflake, Airflow, and AWS Lambda for scalable data pipelines and processing large datasets.
- Developed and managed OAuth-based authentication and secure access across multiple services.
- Collaborated with data engineering teams to optimize large-scale data workflows.
- Implemented AI-powered knowledge graph integration into user interfaces for actionable insights and visualization.

EDUCATION

BACHOLER IN SOFTWARE ENGINEERING — Aug 2019 - Sep 2023

Gujrat

- CGPA: 3.38 / 4.0
- 3× Merit-based Scholarships

- Ranked in Top 15 Students → Youth Laptop Award

SKILLS

JavaScript	Advanced	React	Expert
Node.js	Advanced	Express.js	Advanced
Docker	Advanced	Git	Advanced
RESTful APIs	Advanced	MongoDB	Advanced
Cloud Integration	Advanced	Microservices	Advanced
Nestjs	Advanced	SQL	Intermediate
UML Desiging	Advanced	jest	Intermediate
Cypress	Intermediate	SDLC Modeling	Advanced
Linux	Advanced		

LANGUAGES

Urdu	B1 - Intermediate	Punjabi	Native
English	B1 - Intermediate
